

Week 8 | Javascript Objects

[Start Assignment](#)

Due Tuesday by 11:59pm **Points** 10 **Submitting** a website url

You will need to review the Week 7 resources and the W8D2 demo: [index-3.html](https://neit.instructure.com/courses/51580/files/7040532/download?download_frd=1) 
(https://neit.instructure.com/courses/51580/files/7040532/download?download_frd=1)

Goals:

- To practice using JavaScript syntax.
- To practice using Javascript selectors and HTML attributes
- To practice the input value attribute with HTML forms and Javascript
- To practice building an event driven application
- To practice using JavaScript objects and arrays

In this assignment you will edit an HTML file and follow the documentation to finish the JavaScript within the `<script>` tags.

This page, when complete, will take information from a small form (a person's first name and last name) and store each value separately into an object, that will then be stored into an array. After each new person is entered into the form, they will then be added to the list of people displayed on the page, in alphabetical order.

Folder with index.html file to edit: [w8-1.zip](https://neit.instructure.com/courses/51580/files/7025213/download?download_frd=1) 
(https://neit.instructure.com/courses/51580/files/7025213/download?download_frd=1)

Submission Criteria:

1. Add and commit your changes to GIT.
2. Push to Heroku.
3. Submit a working link to this assignment.

There is only a 10 day late-submission allowed for this assignment.
